Skills

Technical skills

Programming languages

C++ • C • Python • x86-64 assembly

Tools

MatLab • Micro-Cap • Motor-CAD • Git • LaTeX

Devices

Arduino • STM32 • RaspberryPi

OS

Windows • Ubuntu

Craft

Soldering • Milling cutting • 3D printing • Laser cutting

Soft skills

- Problem-solving and critical thinking
- Communication
- Self-learning
- Planning

Education

Moscow Institute of Physics and Technology — **2022 - 2026**

DEPARTMENT OF RADIO ENGINEERING AND COMPUTER TECHNOLOGIES

Work

JSC PromSvyazRadio http://prsvradio.ru/ — **02.2024 - Present**

ASSISTANT TO THE CHIEF ENGINEER

Moscow Institute of Physics and Technology
- Department of Electric Mobility and Magnetic Systems
https://mipt.ru/.../kafedra-elektromobilnosti-i-magnitnykh-sistem — **9.2024 - 11.2024**

TECHNICIAN

JSC AMPEREMAGNETE https://ampere.amtc.ru/ru/ — **10.2024 - 03.2025**

INTERN IN THE GROUP FOR THE DEVELOPMENT OF CONTROLLERS FOR ELECTRIC VEHICLES

JSC AMPEREMAGNETE https://ampere.amtc.ru/ru/ — **03.2025 - Present**

INTERN IN THE ARTIFICIAL INTELLIGENCE DEVELOPMENT GROUP

Projects

- **Electric drive calibration using reinforcement learning** [Link!]

Calibration of Id/Iq currents for vector control of an electric motor using various types of Rl-agents. Training on a model in Motor-CAD, and further training on a measurement bench.
Tools: Python,

- **Radio station remote control system** [Link!]

Control panel for the Motorola XTL 2500 mobile radio station. Implemented on NaPi single-board computers with a microphone and speaker, screen, and buttons (the old version is an operator console with an SGML-based graphical interface). Data is transmitted via Ethernet.
Tools: C/C++, Make, NaPi/RaspberryPi, circuit design and soldering

Hobbies & Interests

- Radio engineering
- Playing the guitar
- Cars and autosport
